Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7 and 15-17, drawn to a method and apparatus of an earphone that comprises a magnetic force between a first magnetic member and a second magnetic member of a main body of the earphone, classified in class 381, subclass 380.
 - II. Claims 8-14, drawn to an earphone attachment device comprising an attaching member for attaching to the earphone, classified in class 381, subclass 374.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group II has separate utility such as an attaching member for attaching to the earphone . See MPEP § 806.05(d).

2. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
